

MotoRAD[®]

Leading the Way in Coverage & Service

VVT Solenoids

MotoRad VVT Solenoids perform under extreme operating conditions while restoring fuel economy and reducing emissions. Engineered to withstand multiple oil formulas and contamination. All MotoRad VVT Solenoids are designed to meet or exceed OEM specifications at our ISO TS16949 manufacturing facilities.

Product Advantages

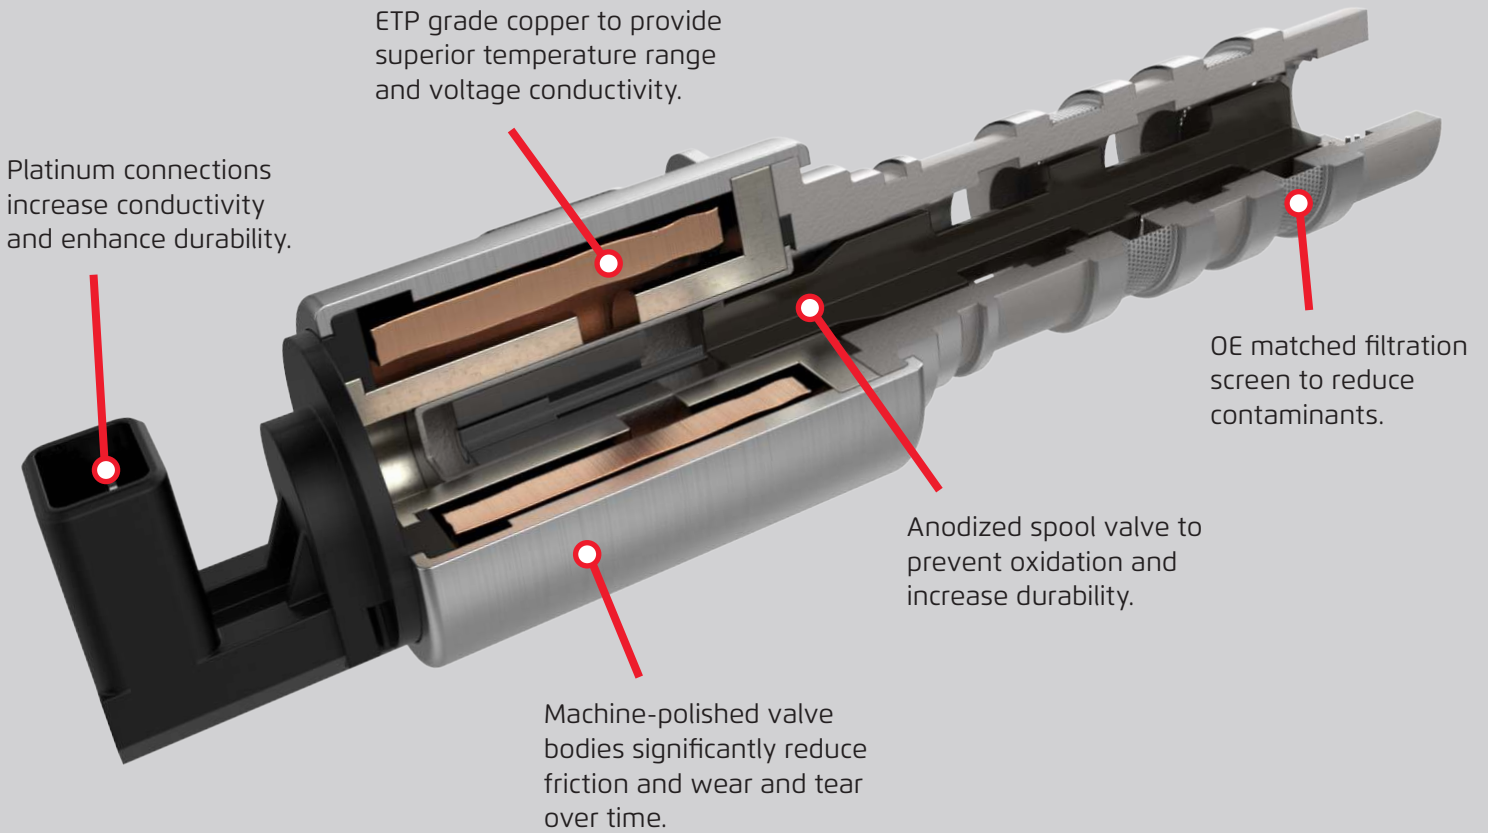

- Machine-polished valve bodies significantly reduce friction and wear and tear over time.
- All in one solution includes premium gaskets and O-rings.
- Engineered to optimize fuel economy and reduce emissions.
- Extensive product durability testing includes extreme temperature, vibration, pressure, humidity, and corrosion resistance, among other tests, to ensure all VVT Solenoids meet or exceed OEM specifications.
- OE matched filtration screen to reduce contaminants.
